LEARNING MANAGEMENT SYSTEM

ABOUT LMS

Learning Management System is a Web-based learning system where instructors can create courses seamlessly and track the progress of their students through their training and/or programs while a student can learn something new at any time having progress of their course or training at any time.

Organizations can utilize the flexibility of the system by crafting their own system best fit within by having features like exporting the results, inviting users, hand out certificates and make integrations with third parties to make their life easier. LMS enables an organization to effectively train a large group of individuals spread across the organization.

ADVANTAGES

☑ Interoperability

☑ Accessibility

☑ Reusability

☑ Adaptability

☑ Durability

☑ Our LMS supports content in various formats: text, video, audio, etc.

☑ One can access materials anytime, from anywhere, teachers can modify the content, and students can see the updated material.

☑ The evaluation of students is easier and fair, based on student attendance and online assessments.

☑ Students and teachers can re-use the material every time they need.

As corporates adopt eLearning for professional development, it is expected to bring in 26% more revenue. Due to the success of eLearning, more companies (73.9%) around the world are employing eLearning for workforce development. To compliment this growth educational technology tools are estimated to undergo a sales spike of more than $325B by 2025.
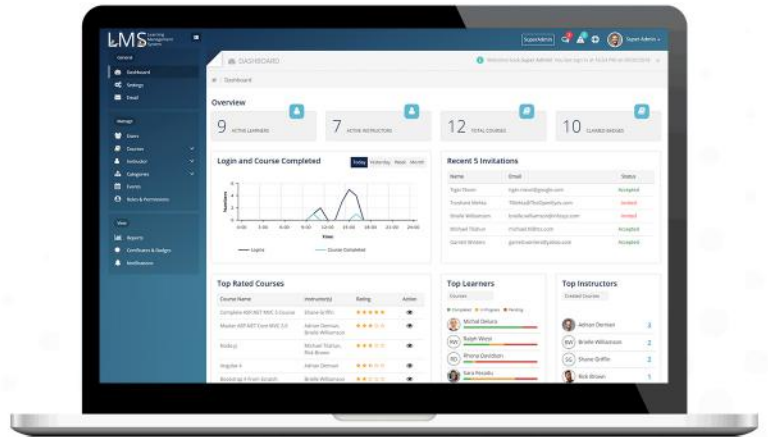

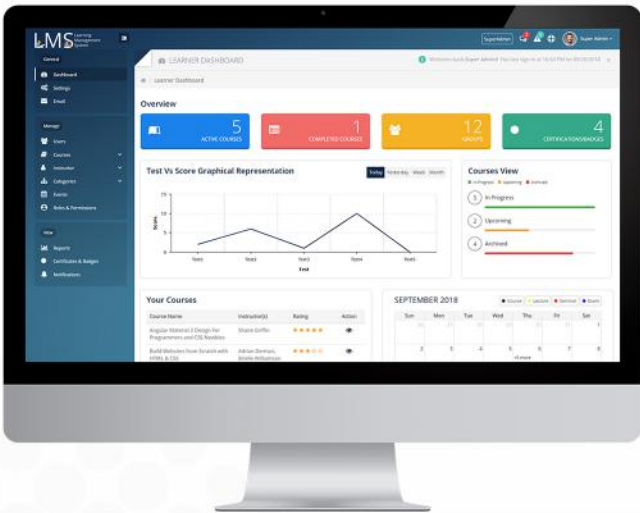

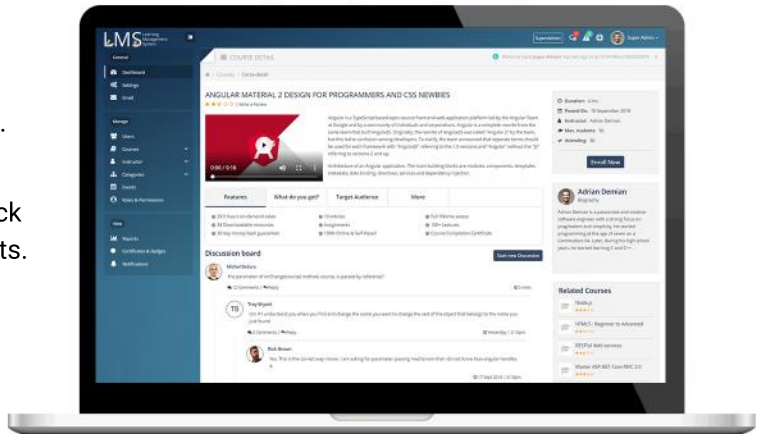

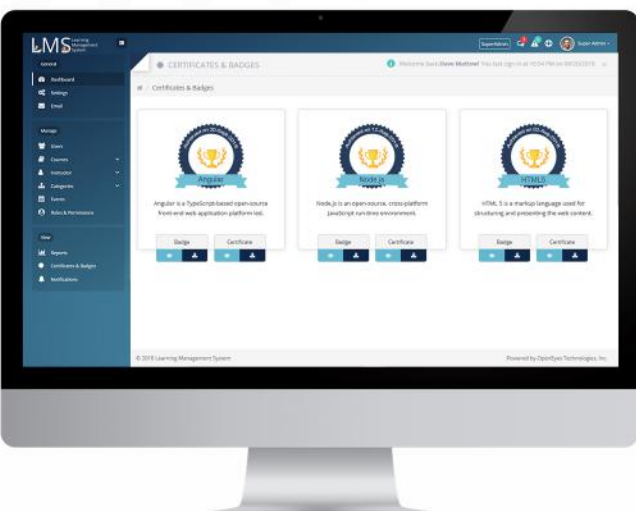

PROMINENT FEATURES

1. Registration and User Management
Create, import and manage users in the platform.
Link to your existing user database. Import/Export CSV.

2. Content Interoperability and Course Management
Web-based content editor lets you drag and drop text, images, videos, links, and more.

3. White-Labelling and Customization
Reinforce your brand by using your logo and branding to create a familiar learning experience.

4. Certification and Badges / Gamification
Gamification and Badges, awards and rankings applied to increase involvement and eLearning course efficiency.
